EEM LECTURE NOTES -

Veer Surendra Sai
University of Technology -

Passivation, in physical
chemistry and engineering,

refers to a material
becoming "passive," that is,
less affected or corroded by
the environment of future
use.

Passivation

(chemistry) - Wikipedia -

Parkerizing, bonderizing,
phosphating, or

phosphatizing is a method
of protecting a steel surface

from corrosion and
increasing its resistance to

wear through the
application of a chemical

phosphate conversion
coating. Parkerizing -
